同意并接受

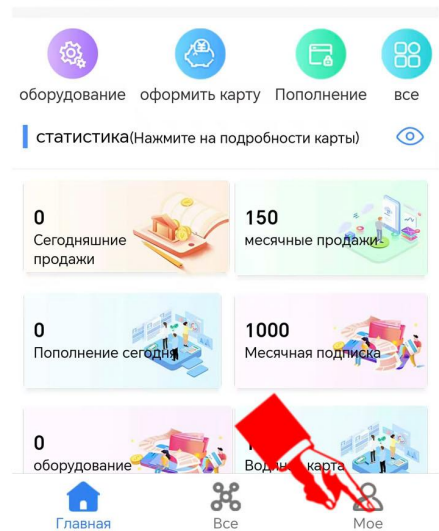

3. When opening for the first time, this prompt will appear; select the "Agree and Accept" button according to your local language.

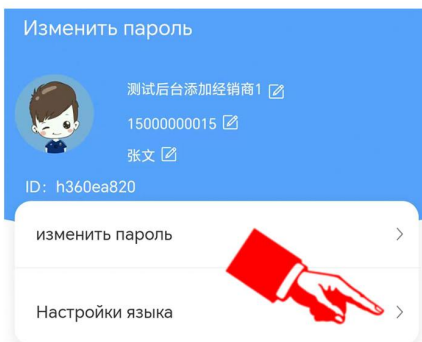

4. Enter your phone number in the first field, enter the last six digits of your phone number in the second field, and click **Подтвердите вход**.

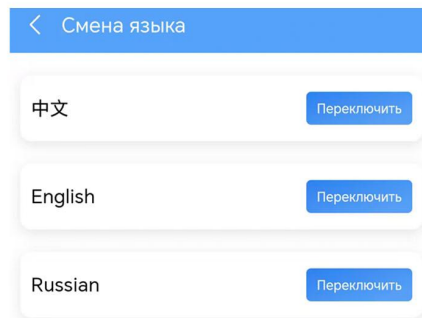

5. Click the icon to enter

6. Click the icon in the bottom right corner

7. Click the icon to select a language

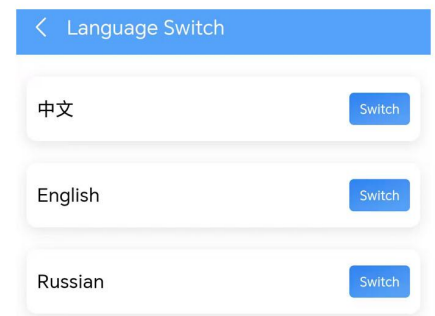

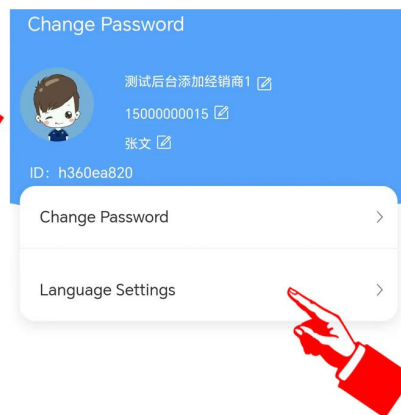

8. Choose a language according to your needs

9. Click the icon pointed to by the arrow to change the information.

2. Switch language

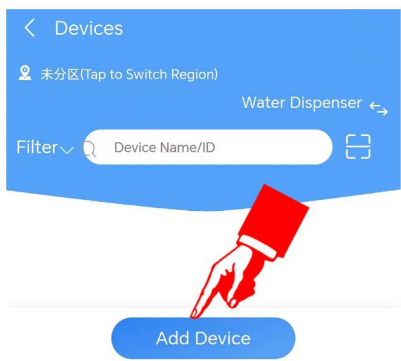

1. Click Account Center in the top right corner

2. Click Language Settings

3. Chinese/English/Russian selectable

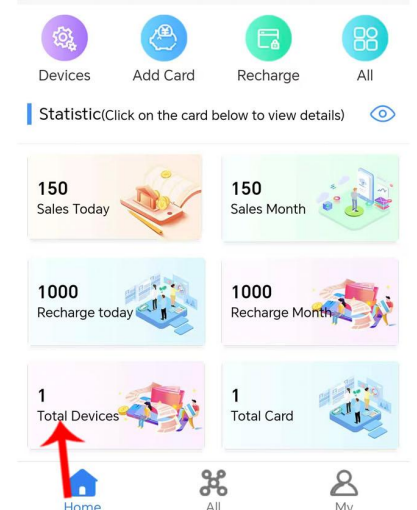

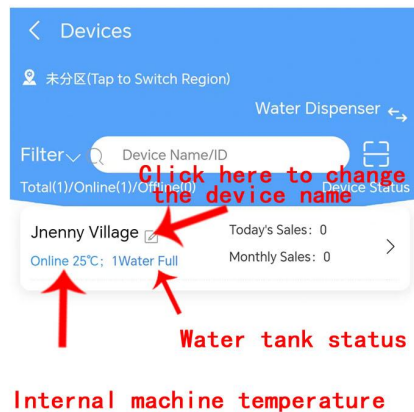

3. Bind Device

1. Click Device Management

2. Click Add Device

3. Click the Scan button to scan the QR code on the back of the motherboard.

4. Place the device, name the machine after the location, and click to confirm submission.

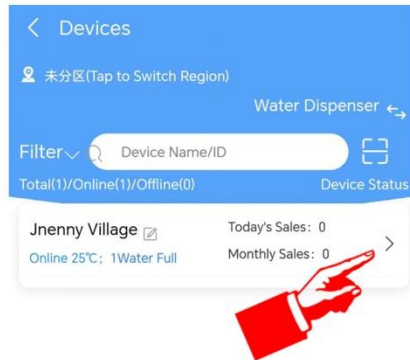

5. After adding is complete, display the device status.

6. See 1 machine in the total equipment section

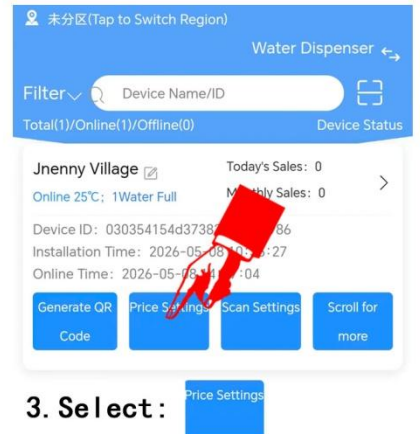

4. Price Setting

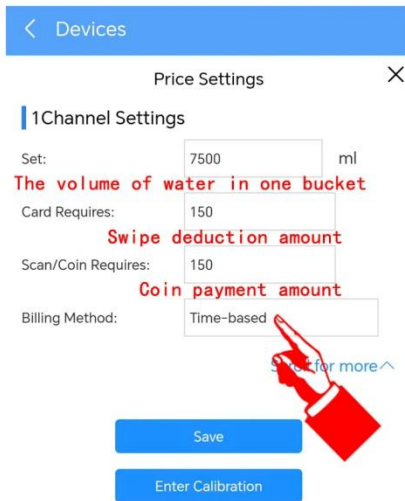

1. Click Device Management on the backend homepage

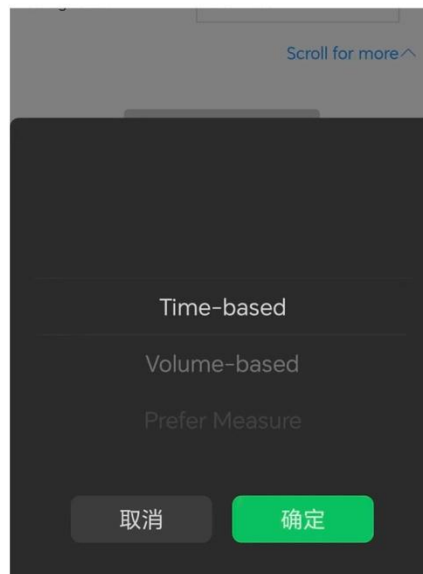

2. Click the ">" icon

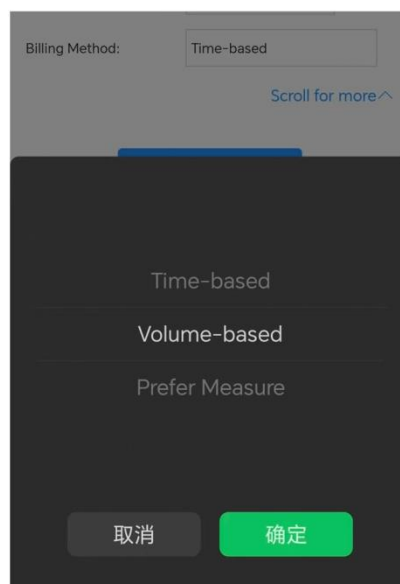

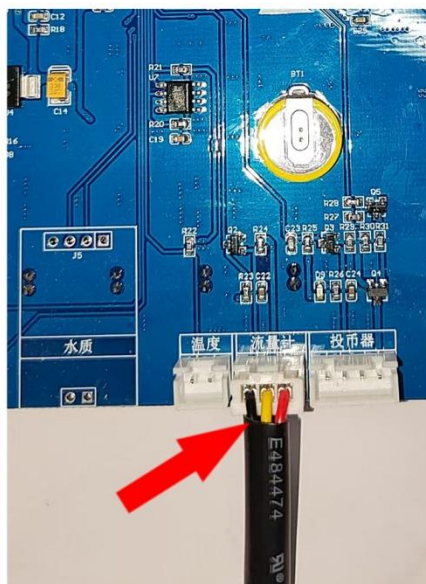

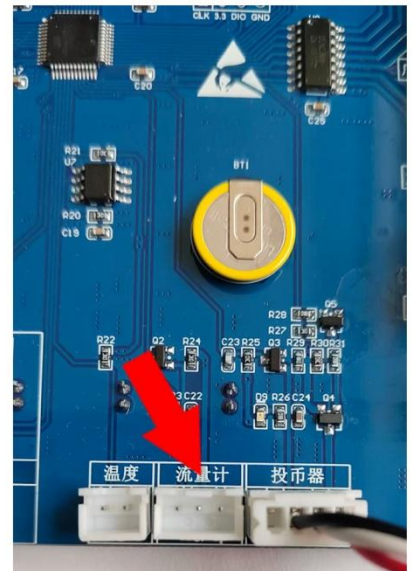

3. Select: Price Settings

7. After setting the water volume and price, select the billing method.

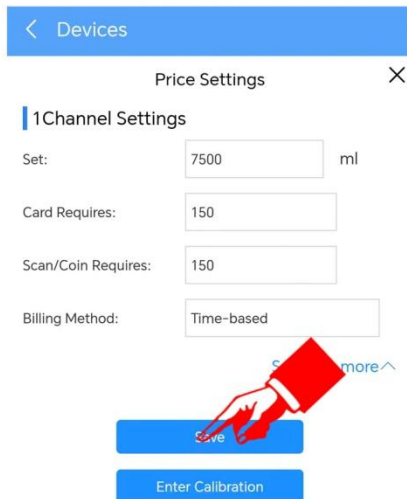

8. Time-based : At the position indicated by the red arrow below the motherboard, select "Time-based " if no flow meter is installed.

Volume-based: At the position indicated by the red arrow below the motherboard, if a flow meter is installed, select "Volume-based".

Prefer Measure: If a flow meter is connected to the machine, select "prefer measure". The machine will first use the flow meter, and automatically switch to timebased billing if the flow meter is damaged.

9. After all settings are completed, click "Save" and then click "Enter Calibration".

10. After entering calibration mode, the time-based screen displays '88.00' and '0688', and the volume-based screen displays '88.00' and '0688'.

11. After the bucket is full, press the stop button to stop the water flow.

12. Press and hold the stop button again until the screen returns to 8, indicating that the price setting is complete.

Dual water outlet motherboard backend

For machines with two or three water outlets, a separate price must be set for each outlet; when saving data to calibrate the water price, a bucket of water be connected to each outlet for calibration.

5. Open Account and Top Up

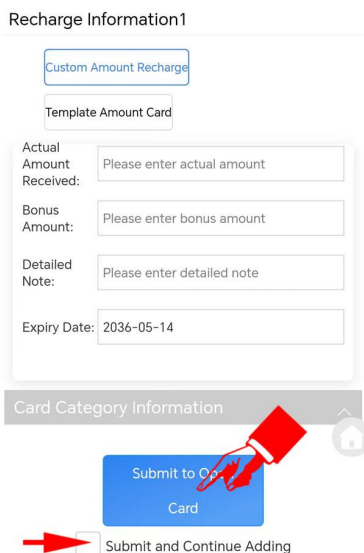

1. Click "Open Card & Recharge" on the mini-program homepage.

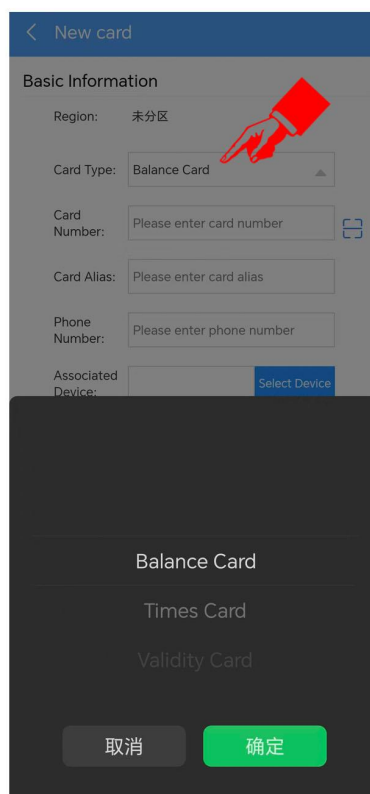

2. Select the corresponding region

3. Card Number: Enter the card number or scan the QR code on the back of the water card.
Card Alias: Cardholder's name.
Phone Number: Cardholder's mobile number.

4. Enter the actual amount received, the gift amount, and specific details about the recharge card, then click "Submit to Open Card". Check "Continue Adding After Suion" to keep this page open for further card openings.

Card Types:

Balance Card: Refers to a card where the cost per bucket of water is deducted upon each swipe. For example, if the card has balance of 100 yuan and each bucket costs 5 yuan, 5 yuan is deducted per swipe, and any remaining balance can be refunded via card swipe.
times Card: For example, if the card is topped up with 100 uses, one use is deducted from the card each time it is swiped for water.
